This is an opportunity to gain employment in the role of Assistant Energy Efficiency Officer with Kildare County Council.

The Position & Role

Kildare County Council is now seeking applications for the post of Kildare Assistant Energy Efficiency Officer who will capitalise on opportunities and support the local authority and the Mid-East Energy Unit to deliver on the ambitious targets of 50% improvement in energy efficiency and 51% absolute reduction in carbon emissions, set for 2030 with a trajectory for net zero by the end of 2050.

The office is whole time and pensionable.

Context

Strengthened national climate policy responses to help tackle the global phenomenon of climate change call for a reduction in emissions of 51% by 2030, with a trajectory towards achieving net-zero emissions by the end of 2050.

The role of local government is considered significant at the forefront of climate action. This is reflected in the local government sectoral strategy published in April 2021; ***Delivering Effective Climate Action 2030 (DECA 2030)***, where an overarching commitment on leadership is highlighted to ensure a coherent approach to climate action across the administrative and political structures of all 31 local authorities with the support and assistance of the four Climate Action Regional Offices (CAROs). This is further reinforced at the regional and local levels through the **Local Authority Climate Action Charter** that commits local authorities to both adaptation and mitigation actions to help deliver on sectoral and national climate obligations.

As part of national obligations on climate action, local authorities are also prescribed to develop and implement a **Local Authority Climate Action Plan**, of a five year duration, to bring forward mitigation and adaptation measures in an integrated manner. As part of the climate action plan each individual local authority is responsible for reducing greenhouse gas emissions from across its own assets, infrastructure and operations, whilst also taking on a broader role of influencing and facilitating others to meet their own targets. In addition, each local authority must bring forward plans to develop a **Decarbonisation Zone (DZ)** as a demonstrator for what is possible for decarbonisation and climate action in a place-based manner.

Kildare County Council has a well-established and ambitious role on climate action. In addition to maintaining strong advocacy for the leadership role of local government on climate action, it hosts the Eastern and Midlands CARO which works across the largest climate action region in the country with 17 local authorities, to drive the climate action agenda at local, regional and national levels. Kildare County Council is a signatory of the **EU Covenant of Mayors** platform for local climate and energy actions. It also fulfils all requirements relating to the delivery and reporting on public sector energy obligations as part of the SEAI M&R system.

More recently, Kildare County Council has entered a working partnership with adjoining local authorities of Wicklow, Meath and Louth to establish the **Mid-East Energy Unit** that will utilise Pathfinder support from the SEAI to address combined climate mitigation ambitions and identify, progress and deliver prescribed energy efficiency and carbon reduction projects in the local authority and the region.

Kildare County Council Climate Action Plan 2024-2029 was published January 2024 in line with requirements of the Climate (Amendment) Act 2021 and implementation of the plan including advancement of the Maynooth Decarbonising Zone (DZ) is pertinent to leading out on behavioural change.
