

Kildare County Council  
Comhairle Contae Chill Dara

**JACOBS**

## **Kerdiffstown Landfill Remediation Project**

Kildare County Council

### **Environmental Impact Assessment Report (EIAR) Volume 3 of 4: Figures**

32EW5604 DOC 0055 | Final

August 2017

Figure List

Chapter	Figure Number	Figure Title
Chapter 3 The Need for the Proposed Project	3.1	Site Location
	3.2	Existing Site Layout
	3.3	Aerial Overview February 2016
	3.4	Location of Key Residential and Commercial Receptors within 1km of the Site
Chapter 4 Description of the Proposed Project	4.1	Existing Site Condition
	4.2	Re-Profiled Site Contours for the Proposed Project
	4.3	Isopachytes - Existing Ground Levels to Proposed Re-Profiled Site Contours
	4.4	Remediation Contours for the Proposed Project
	4.5	Post Settlement Contours for the Proposed Project
	4.6	Cross Sections for the Proposed Project (Sheet 1 of 2)
	4.7	Cross Sections for the Proposed Project (Sheet 2 of 2)
	4.8	Outline Remediation Phasing (Sheet 1 of 2)
	4.9	Outline Remediation Phasing (Sheet 2 of 2)
	4.10	New Site Access Proposed Road Layout
	4.11	New Site Access Proposed Pedestrian Access and Cycleway for the Proposed Project
	4.12	Site Access for the Proposed Project
	4.13	Landfill Infrastructure Compound for the Proposed Project - Layout and Elevation
	4.14	Leachate Management Building - Layout and Elevations
	4.15	Site Office Building - Layout and Elevation
	4.16	Outline Leachate Management Plan for the Proposed Project
	4.17	Leachate Management for the Proposed Project - Pipeline Route and Long Section
	4.18	Outline Landfill Gas Management Plan for the Proposed Project
	4.19	Surface Water Management for the Proposed Project - Outline Drainage Layout
	4.20	Landscape Masterplan for the Proposed Project
	4.21	Changing Rooms Building for the Proposed Project
	4.22	Sewage Drainage for the Proposed Project Plan and Typical Details
Chapter 7 Air Quality and Odour	7.1	Location of Key Residential and Commercial Receptors within 150m of the Site
	7.2	Air Quality Monitoring Locations
	7.3	Isopleth Showing the Predicted 90.4 Percentile of 24- Hour Ground Level Concentration of PM <sub>10</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.4	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of PM <sub>10</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.5	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of PM <sub>2.5</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.6	Isopleth Showing the Predicted 99.7 Percentile of 1-Hour Ground Level Concentration of SO <sub>2</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.7	Isopleth Showing the Predicted 99.2 Percentile of 24-Hour Ground Level Concentration of SO <sub>2</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.8	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of SO <sub>2</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.9	Isopleth Showing the Predicted 99.8 Percentile of 1-Hour Ground Level Concentration of NO <sub>2</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.10	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of NO <sub>2</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.11	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of NO <sub>x</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.12	Isopleth Showing the Predicted 98 Percentile of 1-Hour Ground Level Concentration of SO <sub>2</sub> as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.13	Isopleth Showing the Predicted 98 Percentile of 1-Hour Ground Level Concentration of H <sub>2</sub> S as a Result of Emissions from the Existing 250m <sup>3</sup> Flare During the Remediation Phase
	7.14	Isopleth Showing the Predicted 90.4 Percentile of 24-Hour Ground Level Concentration of PM <sub>10</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.15	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of PM <sub>10</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.16	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of PM <sub>2.5</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.17	Isopleth Showing the Predicted 99.7 Percentile of 1-Hour Ground Level Concentration of SO <sub>2</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.18	Isopleth Showing the Predicted 99.2 Percentile of 24-Hour Ground Level Concentration of SO <sub>2</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.19	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of SO <sub>2</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.20	Isopleth Showing the Predicted 99.8 Percentile of 1-Hour Ground Level Concentration of NO <sub>2</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.21	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of NO <sub>2</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.22	Isopleth Showing the Predicted Annual Mean Ground Level Concentration of NO <sub>x</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.23	Isopleth Showing the Predicted 98 Percentile of 1-Hour Ground Level Concentration of SO <sub>2</sub> as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
	7.24	Isopleth Showing the Predicted 98 Percentile of 1-Hour Ground Level Concentration of H <sub>2</sub> S as a Result of Emissions from the Proposed 600m <sup>3</sup> Flare During the Operation Phase
Chapter 8 Noise and Vibration	8.1	Noise and Vibration Monitoring Locations
	8.2	Temporary Acoustic Screen Locations
	8.3	Calculated Noise Contours for Phase 1 On-Site Remediation Works (No Acoustic Reinforcement in Place)
	8.4	Calculated Noise Contours for Phase 1 On-Site Remediation Works
	8.5	Calculated Noise Contours for Phase 2 On-Site Remediation Works
	8.6	Calculated Noise Contours for Phase 3 On-Site Remediation Works
	8.7	Calculated Noise Contours for Phase 4 On-Site Remediation Works

Chapter	Figure Number	Figure Title
	8.8	Calculated Noise Contours for Phase 5 On-Site Remediation Works
	8.9	Calculated Noise Contours for Phase 6 On-Site Remediation Works
	8.10	Calculated Noise Contours for Phase 7 On-Site Remediation Works
	8.11	Calculated Noise Contours for Phase 8 On-Site Remediation Works
	8.12	Calculated Noise Contours for Operational Phase 1 (Daytime)
	8.13	Calculated Noise Contours for Operational Phase 1 (Evening Time and Night-Time)
<b>Chapter 9 Landscape and Visual</b>	9.1	Land Use Matrix of the Central Study Area
	9.2	Landscape Character Areas (LCA) - Kildare County Development Plan 2017 - 2023
	9.3	Landscape and Visual Assessment Viewpoint Locations
<b>Chapter 10 Archaeology, Architectural Heritage and Cultural Heritage</b>	10.1	Recorded Archaeological and Architectural Sites
<b>Chapter 11 Biodiversity</b>	11.1	Fauna Survey Map
	11.2	Bat Survey Locations
	11.3	Ecological Designated Sites
	11.4	Habitat Map
	11.5	Breeding Birds
	11.6	Ecological Mitigation and Enhancements
<b>Chapter 12 Soils, Geology, Contaminated Land and Groundwater</b>	12.1	Geology, Soils, Contaminated Land and Groundwater Study Area
	12.2	Ground Investigation Locations at Existing Site
	12.3	Geological Cross Sections
	12.4	Waste Basal Contours
	12.5	Waste Thickness
	12.6	Regional Geology - Overburden
	12.7	Regional Geology - Bedrock
	12.8	Bedrock Elevation
	12.9	Depth to Bedrock
	12.10	Aquifer Classification
	12.11	Groundwater Vulnerability
	12.12	Location of Groundwater Monitoring Wells
	12.13	Groundwater Levels - Overburden
	12.14	Groundwater Levels - Bedrock
	12.15	Saturated Waste Thickness and Areas of Saturated Waste
	12.16	Distribution of Ammoniacal Nitrogen (December 2016)
	12.17	Distribution of Chloride (December 2016)
	12.18	Distribution of Phenol (December 2016)
	12.19	Distribution of Mecoprop (December 2016)
	12.20	Distribution of Ammoniacal Nitrogen (February 2017)
	12.21	Distribution of Chloride (February 2017)
	12.22	Distribution of Total Phenol (February 2017)
	12.23	Groundwater Mecoprop Distribution (February 2017)
	12.24	Hydrogeology Conceptual Site Model (Zone 1)
	12.25	Hydrogeology Conceptual Site Model (Zone 2)
	12.26	Hydrogeology Conceptual Site Model (Zone 3)
	12.27	Hydrogeology Conceptual Site Model (Zone 4)
	12.28	Landfill Gas Management Conceptual Site Model (Zone 1)
	12.29	Landfill Gas Management Conceptual Site Model (Zone 2)
	12.30	Landfill Gas Management Conceptual Site Model (Zone 3)
	12.31	Landfill Gas Management Conceptual Site Model (Zone 4)
	12.32	Landfill Gas Management Receptors
<b>Chapter 13 Water - Hydrology</b>	13.1	Hydrological Catchments/ Sub-catchments
	13.2	Surface Water Quality Monitoring Locations and Watercourses
<b>Chapter 14 Traffic and Transport</b>	14.1	Local Road Network and Automatic Traffic Count Locations
<b>Chapter 17 Material Assets</b>	17.1	Existing Utilities
