

I would argue that any plans to build a road through St Catherines Park are terminated as this is such a wonderful and very well utilised amenity for all ages. So much work has gone in to the park over the last ten years to make it the wonderful park it is today and it should not be altered to accommodate a road.

I understand there will be congestion on captains hill if land in confey is developed so would ask that land to build houses is looked at the west end of confey near the rear of intel where an access road linking direct to the lexilip west exit on the M4.
