I'd like to place on record, my concerns regarding the infrastructure & Amenities (or lack there of) if this plan was to be implemented. You propose to make Leixlip one of the most populated towns in the country in what is just a village. The road network as is along with the minor amendments proposed just cannot cope with that type of population increase. Amenities, especially for our young people are a major issue. We were promised a swimming pool some 10 years ago and this was never delivered. This is a must and would show the people of Leixlip that KCC can honour its promises. If this plan were to be carried out in full, the lack of amenities will result in a dramatic surge in anti-social behaviour over the next 10-20 years. It is ill-thought out and in danger of destroying a beautiful town (village !!!) and its community. I urge you to reconsider
