July 9th 2019

To whom it concerns,

Please accept this and the other accompanying document as my submission in respect of the Confey Urban Design Framework (UDF) and LAP for Leixlip.

I have lived in Confey since 1984 and, along with my wife, have reared a family in the intervening period. Throughout the years I have made many good friends and have been very involved in community activity and local sporting organisations. We contributed very substantially in terms time, effort and financially to grow the community that we now live in. It is in recent year's that we are starting to see the full benefits of our efforts.

It was a bit of a surprise that it was a UDF and LAP that have been created when it was a clear directive by the Minister responsible to create a Master Plan for the area and within a 6 month timescale

I must admit that I am quite dismayed when I read the contents of the UDF and the LAP. The focus on the development of land and the building of an excessive number of houses in the area gives me cause for great concern. In my view, these are very much Developer lead and influenced documents. There is a very strong emphasis on 'building densities' that are written and represented in such a way as to encourage 'creep' and 'stealth' to be used by the Developers, and other financially vested individuals or groups, as underhanded tactics to increase the overall unit numbers.

The only real certainty with the plans is the minimum, and I stress minimum, number of units to be built. The rest of the plan has no substance around firm commitments in terms of commitment, finance, resources and timescales. The acknowledgement of the impact on existing residents is derisory, arrogant at times but mainly absent in terms of the affect this will have on their daily lives and living environment.

The accompanying document outlines in a reasonable level of detail specific objections and observations regarding the various proposals contained in the Plan(s). I fully support the points outlined in the documents.

However, I would like to record some additional commentary related to elements of the proposals

Confey UDF KDA

I particularly feel that the proposed house numbers for this area are absolutely excessive. The scale and height of some of the developments is totally out of character for the landscape. The idea that just because the land is beside a Rail Line that it warrants this level of development is a nonsense.

The development will cause untold levels of traffic construction for existing residents for years to come

The outlined pedestrian / cycle links into Riverforest and Glendale Meadows are not required and are likely to contribute to anti-social and criminal activity in existing and new areas. (NB: No mention in any documents about additional policing for Leixlip. I do see mentioned quite a lot the phrase 'passive surveillance' which would seem to attempt to indicate a form of security ??)

The pressure that these new developments will put on already creaking facilities (power, water, sanitation etc) is likely to tip the balance and increase the likelihood of diminished services.

I am not convinced that the 'rail line' will serve the majority of the needs of residents in the new / existing areas leading to serious delays and access / egress issues along Captains Hill and further contributing to the already very high traffic levels on the M4 East.

The proposals is looking to encourage a 'night time economy and street presence outside of work hours'. We need to ask who wants this and / or who would benefit from this. I would suggest that this will not be welcome by the vast majority of residents. More likely it is likely to raise the topic of 'additional policing' requirements

I am disappointed to see that the plan includes the re-location of (the 'underutilised'???) Confey GAA to a new area in the new development. Even in a reduced development their current position would better serve both communities and remain central for both new and existing residents.

Black Avenue KDA

This particular KDA is very worrying. I understand that previous planning / housing applications for land in this area were rejected. What has changed to have this Private Land added to the KDA. Forget for a moment the savage adverse affects this proposal will have on the residents of Mill Lane and Castle Park. What we have here is an attempt to by KCC to use St Catherine's Park as a conduit to develop houses in farmland that is land-locked. This is completely against the quite recent, and unanimous vote in KCC that it should remain a 'protected' resource and free from road development. The destruction of existing access to the Park along the destruction of trees, flora, fauna, hedgerows and animal habitats would be nothing short of a disgrace. So much so that I would have expected that some, if not all, of the sitting Leixlip County Councillors to be up in arms and to be publicly slating the Black Avenue proposals.

Celbridge Road East KDA

This is an area that was subject to the request by Minister English for a Master Plan for Leixlip

This proposal, again on Private Land, will greatly add to the traffic problems through Leixlip village and towards the Celbridge Road. It will add to existing levels of noise and air pollution. This is a point that should not be lost given recent EPA findings around increasing levels of Nitrogen Dioxide being caused by Cars and the health problems associated with regular exposure to such pollution.

Proceeding with the initial development in this area is likely to encourage future attempts to add to the housing stock. Given the 'developer' lead thrust of these plans it is unlikely to be properly challenged by the 'decision makers' who no doubt will be seriously lobbied by groups and individuals that only have a short-term commercial interest and no long-term commitment to Leixlip.

The Leixlip Demesne is a historically important site for Leixlip. It would be preferable that sections of it be developed as a parkland that could be enjoyed and promoted as an amenity in our Town.

Finallyand in conclusion

Running through all the KDAs is the 'deliberately vague' indicative numbers of Housing Units, Apartment Block heights, land reserved for 'future use' and the provision of supporting infrastructure, amenities and services. Existing families will bear the brunt for years to come of even a reduced version of the Plans. My view is that 'just building houses' will not develop a 'sense of community' that is critical for a properly functioning society. We see areas of Dublin that have had similar plans implemented and have ended up with massive 'anti-social' and problems of crime.

I want to re-iterate that, in my mind, these are plans drawn up with the narrow focus of meeting the requirements of Developers. It is structured for Groups to achieve short-term commercial gain while others are left to fight for supporting services and deal with fallout issues for years to come.

I am not expert enough to gauge what level of analysis has been carried out across the various plans relating to Habitats, Water, Power, Flood risk, Landscape and other critical areas of concern. Nor am I in a position to understand the level of accuracy, most importantly the verifiable independence of same and whether it will at all influence the proposals of the Developers.

My overall conclusion is that the LAP / UDR is excessive in terms of the housing numbers for all KDAs. It does not properly deal with concerns and integration with the existing population. I suggest that all aspects need a serious rethink. The overall House numbers and density need to be substantially reduced with some elements, e.g. Black Lane and pedestrian links to Riverforest / Glendale Meadows, removed completely. We also need what was requested by Minister English which is a **Master Plan** for Leixlip

I expect the sitting Kildare County Councillors to take on board all feedback from the good people of Leixlip and remember that they were voted in to actively work for the good of all members of the Community.

'Enhance not Destroy'

Thank you

Gerry Colton

Supporting Documentation - CONFHEY Urban Design Framework (KDA)

1. This Key Development Area is a major urban expansion into the adjacent grasslands on the Northern perimeter of our town that is being justified on the basis of regional figures and proximity to a rail line. The scale is way in excess of any demand locally and will negatively impact on the current residential population both during its construction and once occupied.
2. The National Planning Framework states that development will be achieved through infill and Brownfield development rather than an over-reliance on greenfield, edge of town development. The LAP as proposed does the opposite. We have a large Brownfield option at the HP site that should be used to resolve the current and future housing requirements of the town. This site already also has access to the motorway system.
3. The failure to deal with existing problems within the town and provide the required infrastructure upgrades in advance of any new development shows total disregard for the people of Leixlip and for the problems that will be visited on any new residents moving into the new developments.
4. The plan does not adequately factor in the major expansion of Intel's impact on our existing transport infrastructure.
5. MT3.8 purports to ensure that any significant new development takes place in proximity to public transport routes and can be adequately served by the road network. This objective is being completely ignored by the proposed new KDA at Confey.
6. The proposed works to Cope bridge will make the situation worse for residential areas located east and west of Captain's Hill and lead to further congestion at these pinch points during peak times. In particular it will have a negative impact on accessibility from the estates and lead to more congestion at the bottom of Captain Hill. It will also result in loss of Hedgerows and green areas at Glendale. Connectivity via Captains Hill to schools and local shopping will be a nightmare for residents in existing estates due to increased volumes of traffic.
7. Any plan for Leixlip cannot be considered in isolation as the town forms part of the greater north Kildare area that includes the sister towns of Celbridge and Maynooth. The combined development proposed for the towns is absolutely without justification.

Current Residential Homes		Planned Increase
Leixlip	5219	8534 (+3315) + 38%
Celbridge	6544	9794 (+3250)
Maynooth	4674	8216 (+3542)

Total	16,437	26,554 (+10,107) 39%
--------------	---------------	-----------------------------

Current Population		Forecasted Population
Leixlip	15,504	19,794 (+ 4290) + 27%
Celbridge	20,228	22,801
Maynooth	14,585	18,996
Total	50,317	61,591 + 11,272 or 22%

Currently using Bus/Rail		Projected to use Bus/Rail
Leixlip	1489	2321 (+ 55%)
Celbridge	1457	2071 (+ 42%)
Maynooth	1291	1676 (+ 30%)
Total	4237	6068 (+1831) +43%

Projected increase in Commuters using Road network (not Buses) for work

Currently using Roads		Projected to use Roads
Leixlip	4790	7776 (+ 62%)
Celbridge	6906	9753 (+ 41%)
Maynooth	4005	5363 (+ 34%)
Total	15691	22892 (+ 7201) +54%

The Draft Plan does not reflect or acknowledge the complexity of towns the size of Celbridge, Maynooth and Leixlip lying in such close proximity to each other and sharing the same road networks and Public transport facilities. Any development of Celbridge and Maynooth has a negative knock on impact on Leixlip as our road, bus and rail infrastructure as designed results in passengers and motorists being already in the system before the vehicles reach or pass through our town. The ability of Leixlip residents to access the N4, bus and rail system is already affected by the scale of the exiting populations in Celbridge and Maynooth without any further development of these towns.

8. In all instances once the developers get planning permission they will look to increase the densities to the max and therefore the total numbers are underestimated. In reality the combined new build will double the size of the residential areas in north Kildare. The numbers in the plan are very misleading in regard to the actual size of the development. The current situation at Wonderful barn is a live example of this type of developer opportunism.

9. This proposed development is contrary to S6 – “To phase significant future growth in line with the capacity and delivery of supporting physical infrastructure”. The existing water, waste & power supply which is aging and faulty are unable to support developments of this scale. The towns infrastructure is already strained and is evidenced by power cuts, water leaks and the ongoing stench in the middle of our town from the existing houses. There is limited capacity at the water treatment works. Improvement works earliest will take place is Q4 - 2022.
10. The Strategic Transport Assessment for Confey delivered a number of road infrastructural options. No decision has been made regarding any of these options despite the pivotal importance of them to the entire Local Area Plan.
11. The Sewer network for entire area is almost at capacity with no firm plan to extend the capacity to adequately deal with the proposed new development.
12. Irish Water is currently undertaking studies to prepare a Drainage Area Plan (DAP) and model for the Leixlip area. The delivery of the LAP at Confey in accordance with the Urban Design Framework for these lands will require the cooperation of Irish Water. No agreement is in place with Irish water.
13. This development is contrary to the MASP which clearly states "The integration of transport and land use planning with significant new housing development to be focused at locations proximate to high quality public transport, especially rail access, that is easily accessible to existing local infrastructure such as schools, and local services such as neighbourhood centres, in the interest of a sustainable pattern of urban development; ". The existing rail and public transport system cannot be considered high quality by any yardstick and are in fact currently being reviewed with a strong possibility of service reduction rather than improvement.
14. MT3.11 No Traffic Impact Assessments (TIA) has been completed for this KDA.
15. Protected structures, are part of this development with no plan as to how they will actually be protected.
16. The groundwater in this area described in the Lap as highly vulnerable with sections of extreme vulnerability. This plan requires a detailed underground and over ground site analysis. No detail is provided of what this analysis will entail, when it will be completed, who will undertake same, what level of expertise they will have and what will done with the findings. Groundwater in this area is predominantly moderately vulnerable. The objective of the LAP is to encourage protecting these resources from further deterioration with no commitment to improvement works.
17. MT1.4 No ecological analysis has been completed on the effects of this proposal.
18. The Confey historical / future flooding risk has been clearly identified. The LAP has no on-site flood risk analysis completed. No criteria offered to show what scale or nature of a development will warrant an on-site flood risk analysis.

19. This KDA is facilitating large residential development of at least 1350 units for which there is little or no local demand.
20. The cost of the housing units in this development will make the vast majority of the properties on offer outside the reach of the local population.
21. The development is being proposed to solve a housing issue in Dublin by putting a disproportionate housing expansion into one of the finest towns in county Kildare.
22. This proposed development is contrary to S8 which commits the council to protect, enhance, create and connect natural heritage, high quality amenity areas and other green spaces throughout Leixlip for both biodiversity and recreational use. The KDA is in fact threatening and destroying natural heritage, high quality amenity areas and other green spaces in the Confey area.
23. This proposed development does not respect the setting of the subject lands both in terms of design and scale.
24. This proposed development opens up the possibility of further encroachment into the adjacent farmlands for future development.
25. This proposed development is contrary to the Environmental Report which clearly states the loss of open space and amenity use could also be considered to have the potential to give rise to negative effect on population and human health.
26. The development will destroy a Strategic Open Space that forms part of the green corridor between Leixlip and Dunboyne.
27. This proposed development will destroy one of the most important or 'Key' Green Infrastructure areas (as well as their associated habitats) in our town.
28. Many of the areas original features – trees, hedgerows and grasslands are being removed in this plan which is contrary to the council's own policies.
29. The LAP provides no Road link to M4 or M3 and no plans in place to deliver same.

30. The combined additional traffic from this KDA and other KDAs will bring up to 5000 additional vehicles on to the local streets which are already experiencing traffic congestion at peak commute times and school start and finish times.
31. The development will have very negative impact on traffic flow through Main Street and all the local road network in the Confey area.
32. This development will cause massive increases in pollution and increased noise levels.
33. The development will destroy hedgerows, exiting trees and grasslands.
34. The draft LAP only provides a preliminary design guide for the future development of lands. The requirement by ministerial order is to provide a master plan.
35. The development proposes two-pedestrian/cycle bridges at Glendale & River Forest. The design and scale are unknown. The knock-on effect on existing residents will be very negative creating a flow of activity into settled residential areas that is unwanted and provides no benefit to the people living in these areas. These proposals will also result in loss of green areas to path / cycle ways. The overlooking of existing homes in close proximity to the bridges is also a serious issue for residents. The scale of these bridges will negatively affect both the existing skyline and general visual aspect of these areas. These routes will also facilitate the criminal fraternity looking to visit the homes on both sides of the bridges. No proposal can be considered that facilitates anti-social behaviors and easier entrance and exit for criminals to the existing residential areas bordering the development area.
36. The proposal will have negative impact on residents in River Forest, Glendale, Glendale Meadows, Newtown, Avondale, St Marys Park, Mill Lane and Ryelvale Lawns as they are exposed to through pedestrian and cycle traffic from this development which is being routed through their estates. This will completely alter the current environment in which residents have been living for many years and undermine their property values and way of life.
37. This development will have a very negative impact of the value of existing properties as it will offer new incentivized alternatives to persons looking to move into the town thereby undermining the value of existing secondhand homes which are subject to stamp duty.
38. Ministerial decision 6th Mar 2018 - "The revised Draft Leixlip Local Area Plan shall be published not later than 6 months following the issuing of a Direction." Provided more than a year later – Breach of timeframe so the council are in fact operating ultra vires.
39. The draft LAP proposes phasing/sequencing programme to enable & ensure adequate infrastructure is provided alongside new development. The actual detail in the draft provides no assurance that this development will in fact take place in tandem with the required infrastructure being put in place.

40. Lands will be reserved for the provision of educational facilities, a new community hub to include a community building/civic space, car parking and an extended cemetery. No commitment to actually provide anything.
41. Previous experience tells us that the housing element which is developer funded will be constructed and the new community will then have to fight a rear guard action for decades to get the required infrastructure to match the needs. This is totally unacceptable.
42. Multiple infrastructural aspirations are included with no firm commitment of funding identified to deliver same. The plan itself clearly identifies a key to achieving the delivery of this new neighbourhood in a coherent and sustainable manner is the timely delivery of critical supporting infrastructure. The plan without a guaranteed funding stream is unfortunately not a plan its simply a wish list.
43. The plan is "Encouraging a strong night time economy and presence of residents outside of work hours". Confey is a residential area that has very limited night time activity as residents generally wish to go to bed at night. Why do the planners think we need strong night time activity and residents on the streets at night. This is not Paris. Leixlip is a town that people live and work in and no demand is evident to turn it into the "Temple Bar" of Kildare with all its associated antisocial problems.

44. This plan does not Harmonise with or enhance the existing built and natural environment of Confey. The existing environment in this area is grassland and one-off houses. The required compulsory purchase of long term residents homes to facilitate the new street does not even warrant a mention and will be resisted strongly by both the individual families and residents generally.
45. The availability of trains, the capacity of the rolling stock, the frequency of the trains , the usage levels that are currently in play and are all matters that are straining the existing train service. People will only use trains if they are available, comfortable, on time, travelling to locations they wish to go, clean, have adequate seating, high quality WIFI, are priced competitively, within short walking distance of their homes and facilitated by adequate free parking. The current and proposed future situation at Confey ticks none of the boxes that will encourage and ensure high volume usage of the rail service.
46. The park and ride facility according to the LAP will be within the new development. This area will not be close enough to the train station to encourage use. To have a max 50 spaces is ridiculous and an area of at least 400 spaces would be required. Currently train users are parking outside people's homes in Glendale from early morning until late evening.
47. The plan does not provide the conservation plans re Confey graveyard and archaeology sites of interest in the area.
48. The location, scale and identity of the Confey development lands within the framework are apparently to take into account the presence and proximity to the rail line and the future DART expansion programme. The mere proximity to rail line is no basis for anything. The plan is presuming that the future residents will predominately want to travel on the line. In reality the new residents will want to commute in a multidirectional radial route system which simply means the existing road infrastructure will be absolutely overloaded. The future expansion of the Dart will not be within the timeframe of the development plan and therefore no development should proceed until the completion of the upgraded service.
49. The plan is proposing building heights within the identified higher density lands shall generally provide for 3 to 4 storey buildings but with options to go up to 5 storeys. This scale and height is totally out of line with the character, current built and natural landscape.
50. The lack of commitment in the documentation is a major problem that undermines the entire plan. The suggestion is that (LAP) & (UDF) must work simultaneously in order to improve access to this new development area and the wider Leixlip area as part of the future development of the strategic road network for the entire area. How long will this take? Unless the road and other network is committed or in place to allow more development proceed will be disastrous for the town and the entire area.
51. The plan includes the removal of the sporting and social heart of our community Confey GAA. It suggests providing new sporting facilities for Confey GAA to the north west. No detail is outlined of what exactly will be provided, how or when this alternate facility will be in place. The impact to the existing community will be negative as it will be further away and will not be within ease of walking distance for people who use this as a social hub at present. Loss of employment as Escape Gym would also be affected.
52. If any loss of our existing playing pitches is to take place the solution is surely to relocate the pitches to the field directly behind the club house described as residential area 5. This would retain the Club house etc in the existing location while freeing up the pitches if required for sensitive low rise housing and adequate park and ride at the western end of the site.
53. The plan suggests a minor extension to the south and west c. 1 acre of our existing cemetery. I submit this has no merit the until the problem of flooding is rectified.
54. The plan includes a new Public park. A new park will be welcomed but we already have issues with the maintenance and upkeep of St. Catherine's Park. If we cannot get the issues resolved with our existing park after almost 20yrs where is funding for the upkeep of this new park.
55. Future generations will thank Kildare County Councillors for taking on board the genuine concerns of the Leixlip population and altering this Draft plan to bring the scale of this development to a level that matches the actual demand for our town and not the greater Dublin area. We need to provides realistic

possibility of the next generation of Leixlip natives acquiring homes in our town. Building homes that are unaffordable will do nothing to help the younger residents of our town should they decide to put down roots in our town.

56. I submit that should any development go ahead no construction traffic is allowed use the Captains Hill.

57. In summary the requirement for Leixlip and Confey is to have a plan that deals with the issues already facing the town as its stands rather than looking to expand. Expansion as set out in the Draft LAP will make the existing and future situation far worse. Leixlip and Confey are beautiful places that are very sought after locations for people to live. Its critical that sympathetic and innovative planning takes place with adequate infrastructure provided to support same. The scale should match the community's natural expansion requirements not aim at a number just to satisfy a strategic policy that is very distant from the residents of Leixlip who are the primary stakeholders in our town.

GC Supporting Document - BLACK AVENUE KEY DEVELOPMENT AREA (KDA)

1. The council should reinstate the previous objective removed from plan - 'To protect the amenity of St. Catherine's Park. "No road proposal shall be considered by this Council through the park within the Council's ownership or jurisdiction.' In a complete "U" turn the council is now in fact proposing a road into the park to facilitate a major housing development at Black Avenue. In 2017 - 1021 submissions regarding protection of St. Catherine's Park from road development.
2. This Key Development Area was removed from the last Local Area Plan by unanimously backed Material Alterations.
3. This proposed development is contrary to S6 – "To phase significant future growth in line with the capacity and delivery of supporting physical infrastructure" The existing water, waste & power supply infrastructure which is aging and faulty are unable to support developments of this scale. The towns infrastructure is already strained and is evidenced by power cuts, water leaks and ongoing stench in the middle of our town from the existing houses. There is limited capacity at the water treatment works. Improvement works earliest will take place is Q4 - 2022.
4. This development is contrary to the MASP which clearly states "The integration of transport and land use planning with significant new housing development to be focused at locations **proximate to high quality public transport, especially rail access, that is easily accessible to existing local infrastructure such as schools, and local services such as neighbourhood centres**, in the interest of a sustainable pattern of urban development; "
5. This proposed development is contrary to MT3.8 "To ensure that any significant new development takes place in proximity to public transport routes and can be adequately served by the road network." The Black avenue proposal has no public transport route and no road network.
6. MT3.11 No Traffic Impact Assessments (TIA) has been included for this KDA
7. The groundwater in this area described in the Lap as highly vulnerable with sections of extreme vulnerability.
8. MT1.4 No ecological analysis has been completed on the effects of this proposal.
9. No commitment to on-site flood risk analysis.
10. This KDA is facilitating large residential development of at least 350 units for which there is no demand.

11. This proposed development is contrary to S8 which commits the council to protect, enhance, create and connect natural heritage, high quality amenity areas and other green spaces throughout Leixlip for both biodiversity and recreational use. The KDA is in fact threatening and destroying natural heritage, high quality amenity areas and other green spaces in the environment of St Catherine's Park.
12. This proposed development is inside the environment of an existing park and can have no positive impact on the park.
13. The proposal provides a significant negative impact on a green and safe access for pedestrian and cyclists using St. Catherine's Park through increased traffic volumes.
14. The existing car park facilities will be reduced as the proposed egress route is via the car park for vehicular traffic from the development.
15. This proposed development does not respect the setting of the subject lands and or the adjoining parklands.
16. This proposed development opens up the possibility of further encroachment into the existing park for future development.
17. This proposed development is contrary to the Environmental Report which clearly states the loss of open space and amenity use could also be considered to have the potential to give rise to **negative effect on population and human health.**
18. The development will destroy a Strategic Open Space which is right in the middle of proposed Black Avenue housing development in St Catherine's.
19. This proposed development will destroy areas of St. Catherine's Park which is considered to be one of the most important or 'Key' Green Infrastructure areas (as well as their associated habitats) in our town.
20. No new linear park is being provided along Black Avenue. The existing linear park which starts at the entrance from the Mill Lane is in affect being reduced and many of its original features – trees, hedgerows and grasslands being removed contrary to the council's own policies.
21. Connectivity via Mill Lane to R148 will be a nightmare for residents due to increased traffic volume, sightlines, narrow road, poor pedestrian walkways and traffic delays.

22. The development will have very negative impact on traffic flow through Main Street.
23. The existing residents Health and Safety is being put at risk due to the traffic implications to response times from Emergency services i.e. Fire Brigade. which is located in Mill Lane.
24. The egress route from this development is through the car park in St. Catherine's Park which opens the park to 24/7 vehicular traffic.
25. This proposal will result in the loss of biodiversity through the destruction of woodlands at hill area of the Black Avenue as the roadway will need to widen to allow two-way traffic.
26. This development will cause massive increases in pollution, increased noise levels, and illegal dumping.
27. The development will destroy hedgerows, exiting trees and parklands with five additional pedestrian entrances being created to the park and Glendale meadows.
28. The development includes the creation of two pedestrian access routes into existing cul de sacs at Glendale Meadows that will completely alter the current environment in which residents have been living for many years and undermine their property values and way of life.
29. The development facilitates anti-social behaviors and easier entrance and exit for criminals to the existing residential areas bordering the area.
30. The proposal has been rejected previously by the council and is simply included to facilitate a private landowner who has landlocked grassland to convert same into a massive financial profit.
31. This development will have a very negative impact of the value of existing properties as it will offer new incentivized alternatives to persons looking to move into the town thereby undermining the value of existing secondhand homes which are subject to stamp duty.

Comment: It obvious from both the information day and the plan itself that whoever was the author of this proposal has no sense of the place or of the existing community.

GC Supporting Document - CELBRIDGE ROAD EAST KEY DEVELOPMENT AREA (KDA)

1. This Key Development Area was removed from the last Local Area Plan by unanimously backed Material Alterations.
2. This proposed development is contrary to S6 – “To phase significant future growth in line with the capacity and delivery of supporting physical infrastructure” The existing water, waste & power supply infrastructure which is aging and faulty are unable to support developments of this scale. The towns infrastructure is already strained and is evidenced by power cuts, water leaks and ongoing stench in the middle of our town from the existing houses. There is limited capacity at the water treatment works. Improvement works earliest will take place is Q4 - 2022.
3. This development is contrary to the MASP which clearly states "The integration of transport and land use planning with significant new housing development to be focused at locations **proximate to high quality public transport, especially rail access, that is easily accessible to existing local infrastructure such as schools, and local services such as neighbourhood centres**, in the interest of a sustainable pattern of urban development; "
4. MT3.11 No Traffic Impact Assessments (TIA) has been included for this KDA.
5. 18 of the protected structures on the Record of Protected Structures, are part of Leixlip.
6. Castle Demense, this represents the huge efforts made by Desmond Guinness to protect Leixlip heritage.
7. The groundwater in this area described in the Lap as highly vulnerable with sections of extreme vulnerability.
8. MT1.4 No ecological analysis has been completed on the effects of this proposal.
9. No commitment to on-site flood risk analysis.
10. This KDA is facilitating large residential development of at least 355 units for which there is no demand.
11. This proposed development is contrary to S8 which commits the council to protect, enhance, create and connect natural heritage, high quality amenity areas and other green spaces throughout Leixlip for both biodiversity and recreational use. The KDA is in fact threatening and destroying natural heritage, high quality amenity areas and other green spaces in the Guinness estate.

12. This proposed development does not respect the setting of the subject lands.
13. This proposed development opens up the possibility of further encroachment into the existing Guinness estate for future development.
14. This proposed development is contrary to the Environmental Report which clearly states the **loss of open space** and amenity use could also be considered to have the potential to give rise to **negative effect on population and human health**.
15. The development will destroy a Strategic Open Space that forms part of the green corridor in the Leixlip area.
16. The Height of land - LAP is vague and allows for misinterpretation by developers.
17. The detail is ambiguous "generally 2 stories in height" does this allow for apartment blocks? Figure 12.2 - 2 sets of residential units similar to apartment blocks.
18. This proposed development will destroy areas of the Guinness estate which is considered to be one of the most important or 'Key' Green Infrastructure areas (as well as their associated habitats) in our town.
19. Many of its original features – trees, hedgerows and grasslands are being removed contrary to the council's own policies.
20. Connectivity via Celbridge road will be a nightmare for residents due to increased volumes of traffic combined with the adjacent Wonderful Barn development of (450) units.
21. No Road link to M4 - no plans in place to deliver same. The combined additional traffic from this KDA and the wonderful barn will bring up to 1500 additional vehicles on to the local streets.
22. The development will have very negative impact on traffic flow through Main Street.
23. This development will cause massive increases in pollution and increased noise levels.

24. The development will destroy hedgerows, existing trees and parklands with six additional pedestrian entrances being created to the development. Two were previously removed from LAP due to health and safety concerns, 1 requires major engineering to scale a 100 foot cliff and 1 requires unlimited access to the grounds of Leixlip Castle.

25. The proposal will have negative impact on residents in Leixlip Park, Celbridge Road, Highfield Park, as they are exposed to through pedestrian and cycle traffic from this development. This will completely alter the current environment in which residents have been living for many years and undermine their property values and way of life.

26. The proposal facilitates anti-social behaviors and easier entrance and exit for criminals to the existing residential areas bordering the development area.

27. The proposal has been rejected previously by the council and is simply included to facilitate a private landowner who has landlocked grassland to convert same into a massive financial profit.

28. This development will have a very negative impact of the value of existing properties as it will offer new incentivized alternatives to persons looking to move into the town thereby undermining the value of existing secondhand homes which are subject to stamp duty.

29. To protect the walled area proposed by Kildare Development Plan KDA Celbridge Road East, which is part of Leixlip Castle Demense. A Demense this year celebrates 847 years by zoning area KDA 1 Celbridge Road East as parkland.

30. Future generations will thank Kildare County Councilors for saving this vital historical estate that will add greatly to the tourism potential of Kildare and the Guinness history.
