

To whom it may concern I wish to make the following submission in regard to the Draft LAP for Leixlip.

- 1) The policy is to provide a minimum 3315 new housing units in Leixlip. This is being achieved by increasing housing unit densities at Key Development Areas and inserting new Key Development Areas into the Plan without any documented acceptable reasoning or demand to justify these decisions.
- 2) The actual delivery of the target may extend beyond the life of the plan up to 2029 therefore setting out up to ten years construction traffic and work in our town.
- 3) We should not be rezoning land that won't be developed within the lifecycle of this LAP.
- 4) The LAP fails to provide a Master Plan as directed by ministerial order.
- 5) Key Development Areas that were removed from the last Local Area Plan by unanimously backed Material Alterations have been included again without any reasoned argument to support same.
- 6) Previous objective removed from Plan - 'To protect the amenity of St. Catherine's Park. No road proposal shall be considered by this Council through the park within the Council's ownership or jurisdiction.' In a complete "U" turn the LAP is now in fact proposing a road into the park to facilitate a major housing development at Black Avenue. This change is despite 1021 submissions in 2017 regarding protection of St Catherine's Park from road development. To totally ignore the people is dictatorial and undemocratic.
- 7) The Draft LAP makes no specific provision for
 - A swimming pool site.
 - A civil building with theatre or performance space.
 - Homes for the elderly/retired – 25% of Leixlip population 55+
 - Affordable homes.
 - Social housing.
 - A Sensory Garden.
 - Charging points for electric vehicles.
 - Adequate parking in the village, train stations or the proposed new Confey development.
 - Maintaining existing estates, green areas or new developments.
 - Improving and maintaining the existing water, waste & power supply infrastructure which is aging and faulty.

We have witnessed the power cuts, water leaks and ongoing stench in the middle of our town from the existing systems.

The Primary Care Centre - location in Collinstown is not suitable to stakeholders – young, old and infirm and without transport. A location central to the town and on a public transport route is critical

In addition, nothing included to deal with work that volunteers, residents associations, tidy towns and individuals are doing with little or no support from KCC.

8. The National Planning Framework states that development will be achieved through infill and Brownfield development rather than an over-reliance on greenfield, edge of town development. The LAP as proposed does the opposite. We have a large Brownfield option at the HP site that should be used to resolve the current and future housing requirements of the town. This site already also has access to the motorway system.

9. The failure to deal with existing problems within the town and provide the required infrastructure upgrades in advance of any new development shows total lack of appreciation of the current problems the town faces and disregard for the people of Leixlip and for the problems that will be visited on any new residents moving into the new developments.

10. The plan does not adequately factor in the major expansion of Intel's impact on our existing transport infrastructure.

11. Any plan for Leixlip cannot be considered in isolation as the town forms part of the greater north Kildare area that includes the sister towns of Celbridge and Maynooth. The combined development proposed for the towns is absolutely without justification.

Current Residential Homes		Planned Increase
Leixlip	5219	8534 (+3315) + 38%
Celbridge	6544	9794 (+3250)
Maynooth	4674	8216 (+3542)
Total	16,437	26,554 (+10,107) 39%

Current Population		Forecasted Population
Leixlip	15,504	19,794 (+ 4290) + 27%
Celbridge	20,228	22,801
Maynooth	14,585	18,996
Total	50,317	61,591 + 11,272 or 22%

Currently using Bus/Rail		Projected to use Bus/Rail
Leixlip	1489	2321 (+ 55%)
Celbridge	1457	2071 (+ 42%)
Maynooth	1291	1676 (+ 30%)
Total	4237	6068 (+1831) +43%

Projected increase in Commuters using Road network (not Buses) for work		
	Currently using Roads	Projected to use Roads
Leixlip	4790	7776 (+ 62%)
Celbridge	6906	9753 (+ 41%)
Maynooth	4005	5363 (+ 34%)
Total	15691	22892 (+ 7201) +54%

The Draft Plan does not reflect or acknowledge the complexity of towns the size of Celbridge, Maynooth and Leixlip lying in such close proximity to each other and sharing the same road networks and Public transport facilities. Any development of Celbridge and Maynooth has a negative knock on impact on Leixlip as our road, bus and rail infrastructure as designed results in passengers and motorists being already in the system before the vehicles reach or pass through our town. The ability of Leixlip residents to access the N4, bus and rail system is already affected by the scale of the exiting populations in Celbridge and Maynooth without any further development of these towns.

12. In all instances once the developers get planning permission they will look to increase the densities to the max and therefore the total numbers are underestimated. In reality the combined new build will double the size of the residential areas in north Kildare. The numbers in the plan are very misleading in regard to the actual size of the development. The current situation at Wonderful barn and Westfield are live examples of this type of developer opportunism.

13. This proposed LAP is contrary to S6 – “To phase significant future growth in line with the capacity and delivery of supporting physical infrastructure”. The existing water, waste & power supply which is aging and faulty are unable to support developments of this scale. The towns infrastructure is already strained and is evidenced by power cuts, water leaks and the ongoing stench in the middle of our town from the existing houses. There is limited capacity at the water treatment works. Improvement works earliest will take place is Q4 - 2022.

14. The Sewer network for entire area is almost at capacity with no firm plan to extend the capacity to adequately deal with the proposed new development. Currently there is a major issue with foul sewer pipes at the junction of Station Road and The Clay Steps. At this location, two 18 inch pipes and three 9 inch pipes combine just before the bridge on the Main Street in to one 18 inch pipe and one 9 inch pipe. That’s the same volume of waste being forced through pipes with less than half the capacity. This has and still continues to cause blockages and during heavy rains has even lifted parts of the roadway at the bridge. There is a continuous foul odour at this point and those who walk at this point or use the Aldi supermarket are well aware of this fact. To build more houses and add extra waste to this line is a dangerous act in itself and will cause even more harm to our town and possibly the health of its citizens.

15. MT1.4 No ecological analysis has been completed on the effects of this LAP.

16. The towns historical / future flooding risks have been clearly identified. The LAP has no on-site flood risk analysis completed. No criteria offered to show what scale or nature of a development will warrant an on-site flood risk analysis.

17. The proposed expansion of housing in particular is completely out of line with the actual local demand.
18. The cost of the housing units in this LAP will make the vast majority of the properties on offer outside the reach of the local population.
19. The LAP is being proposed to solve a housing issue in Dublin by putting a disproportionate housing expansion into one of the finest towns in county Kildare.
20. This proposed LAP is contrary to S8 which commits the council to protect, enhance, create and connect natural heritage, high quality amenity areas and other green spaces throughout Leixlip for both biodiversity and recreational use. The LAP is in fact threatening and destroying natural heritage, high quality amenity areas and other green spaces in the Leixlip.
21. This proposed LAP does not respect the setting of the subject lands both in terms of design and scale.
22. This proposed LAP opens up the possibility of further encroachment into the adjacent farmlands, parks and private estates for future development.
23. This proposed LAP is contrary to the Environmental Report which clearly states the loss of open space and amenity use could also be considered to have the potential to give rise to negative effect on population and human health.
24. The LAP will destroy a Strategic Open Spaces that forms part of the green corridors in Leixlip and the surrounding area.
25. This proposed LAP will destroy 'Key' Green Infrastructure areas (as well as their associated habitats) in our town.
26. Many of the areas original features – trees, hedgerows and grasslands are being removed in this plan which is contrary to the council's own policies.
27. The LAP provides no road links to M4 or M3 and no plans in place to deliver same.
28. The combined additional traffic from this LAP will bring up to 5000 additional vehicles on to the local streets which are already experiencing traffic congestion at peak commute times and school start and finish times.
29. The LAP will have very negative impact on traffic flow through Main Street and all the local road network in the Leixlip area.
30. This LAP will cause massive increases in pollution and increased noise levels in our town.
31. The draft LAP only provides a preliminary design guide for the future development of lands. The requirement by ministerial order is to provide a master plan.

32. The LAP proposes pedestrian/cycle routes through out the town. The design and scale are unknown. The knock-on effect on existing residents will be very negative creating a flow of activity into settled residential areas that is unwanted and provides no benefit to the people living in these areas. These proposals will also result in loss of green areas to path / cycle ways. The overlooking of existing homes in close proximity is also a serious issue for residents. No proposal should be considered that facilitates anti-social behaviors and easier entrance and exit for criminals to the existing residential areas bordering the proposed new development areas.

33. The LAP will have negative impact on residents in existing estates as they are exposed to through pedestrian and cycle traffic from new developments which is being routed through their estates. This will completely alter the current environment in which residents have been living for many years and undermine their property values and way of life.

34. This LAP will have a very negative impact of the value of existing properties as it will offer new incentivized alternatives to persons looking to move into the town thereby undermining the value of existing secondhand homes which are subject to stamp duty.

35. Ministerial decision 6th Mar 2018 - "The revised Draft Leixlip Local Area Plan shall be published not later than 6 months following the issuing of a Direction." Provided more than a year later – Breach of timeframe so the council are in fact operating ultra vires.

36. The draft LAP proposes phasing/sequencing programme to enable & ensure adequate infrastructure is provided alongside new development. The actual detail in the draft provides no assurance that this development will in fact take place in tandem with the required infrastructure being put in place.

37. Lands will be reserved for the provision of various facilities with no commitment to actually provide anything.

38. Previous experience tells us that the housing element which is developer funded will be constructed and the new community will then have to fight a rear guard action for decades to get the required infrastructure to match the needs. This is totally unacceptable.

39. Multiple infrastructural aspirations are included with no firm commitment of funding identified to deliver same. The plan itself clearly identifies a key to achieving the delivery in a coherent and sustainable manner is the timely delivery of critical supporting infrastructure. The LAP without a guaranteed funding stream is unfortunately not a plan that can deliver this infrastructure, its simply a wish list.

40. The LAP is "Encouraging a strong night time economy and presence of residents outside of work hours". Leixlip is a residential area that has very limited night time activity outside of the main street. Residents generally wish to go to bed at night. Why do the planners think we need strong night time activity and residents on the streets at night. This is not Paris. Leixlip is a town that people live and work in and no demand

is evident to turn it into the "Temple Bar" of Kildare with all its associated antisocial problems.

41. This plan does not harmonise with or enhance the existing built and natural environment of Leixlip.

42. The required compulsory purchase of long term residents homes to facilitate the new street does not even warrant a mention and will be resisted strongly by both the individual families and residents generally.

43. The availability of trains, the capacity of the rolling stock , the frequency of the trains , the usage levels that are currently in play and are all matters that are straining the existing train service. People will only use trains if they are available, comfortable, on time, travelling to locations they wish to go, clean, have adequate seating, high quality WIFI, are priced competitively, within short walking distance of their homes and facilitated by adequate free parking. The current and proposed future situation meets none of the criteria that will encourage and ensure high volume usage of the rail service.

44. The park and ride facility will not be close enough to the train station to encourage use particularly during inclement weather. To have a max 50 spaces is ridiculous and an area of at least 400 spaces would be required. Currently train users are parking outside peoples homes in Glendale and other adjacent estates from early morning until late evening. which is the source of ongoing inconvenience to the residents.

45. The plan does not provide the conservation plans for archaeology sites of interest in the town.

46. The future expansion of the Dart will not be within the timeframe of the development plan and therefore no development based on an upgraded high quality train service should proceed until the completion of the upgraded service.

47. The LAP is proposing development at a scale and height that is totally out of line with the character, current built and natural landscape in our town.

48. The lack of commitment in the documentation is a major problem that undermines the entire plan. The suggestion is that (LAP) & (UDF) must work simultaneously in order to improve access to this new development area and the wider Leixlip area as part of the future development of the strategic road network for the entire area. Unless the road and other network is committed or in place to allow more development proceed will be disastrous for the town and the entire area.

49. Some elements in the Leixlip Local Area Plan are regarded to give rise to adverse effects on the integrity of European Sites.

50. The LAP suggests a minor extension to the south and west c. 1 acre of our existing cemetery. I submit this has no merit until the problem of flooding is rectified.

51. The LAP includes new public parks. This could be welcomed but we already have issues with the maintenance and upkeep of St. Catherine's Park. These issues are unresolved with after 20yrs where is funding for the upkeep of these new parks.

52. The LAP identifies serious potential impacts to

- Rye Water Valley
- Disturbance to habitats and species associated with the Rye Water
- River Liffey pNHA through habitat loss and disturbance
- Underlying hydrological conditions and tufa springs

53. The KCC SEA Environmental Report indicates the LAP has potential significant negative effects on

- local services and utilities- such as water supply and wastewater infrastructure and electricity demand.
- air quality, noise and climate- due to increased emissions & pollution
- features of archaeological and architectural heritage,
- biodiversity, ecological, land and soil
- the environment
- human health & amenities

54. The back land regeneration off the main street should be used to solve the towns parking deficit, provide a primary care centre and locate some homes for the elderly.

55. The provisions for childcare are totally unsatisfactory for either the current of future population of the town.

56. Future present and generations will thank Kildare County Councillors for taking on board the genuine concerns of the Leixlip population and altering this Draft plan to bring the scale of this development to a level that matches the actual demand for our town and not the greater Dublin area. We need to provides realistic possibility of the next generation of Leixlip natives acquiring homes in our town. Building homes that are unaffordable will do nothing to help the younger residents of this area should they decide to put down roots in our town.

57. I submit that should any development go ahead no construction traffic is allowed use the Captains Hill or Celbridge roads.

58. In summary the requirement for Leixlip is to have a plan that deals with the issues already facing the town as its stands rather than looking to expand. Expansion as set out in the Draft LAP will make the existing and future situation intolerable for our residents. Leixlip is a beautiful place that is very sought after as a location for people to live. Its critical that sympathetic and innovative planning takes place with adequate infrastructure provided in a timely manner to support same. The scale of any future development should match the communities natural expansion requirements not aim at a number just to satisfy a strategic policy that is very distant from the residents of Leixlip who are the primary stakeholders in our town.
