I do not think anyone in leixlip or lucan want this bridge/moter way up into the the park not only will it cause problem but will ruin st.catherines park. with the N4 already being right beside it. will bring in more noise which will effect the people living in weston park, kew park surrounding areas and all the people living in leixlip. Government are constantly talking about how much money is being wasted in this country and this is something else that will cause a lot of problems. If something like this was to happen it would be better if the roads that are already there are just emproved as many of them are messie, with no proper paths and roads that are very rough due to how old they are. It would be better to improve the things we already have rather than just forgetting about them and putting new crap that nobody wants
