Project Update September 2026

Updates since June 2026

- Works commenced on site in late May, works completed since the update in June;
  - Removal of asbestos containing material.
  - Removal all walls due for demolition including front elevation.
  - Removal of the internal floor slab and reduced dig of the internal fill to accommodate proposed underpinning works.
- It is still expected that the works will be completed within the original 18-month period.
- Works to be completed over the next quarter include;
  - Completion of the underpinning works and reinstatement of the internal floor slab and associated services.
  - Completion of the additional steel works and progress toward the installation of the new roof.
  - Commence the rear extension and associated ground works.

Front Elevation
Removal works.
